Subject: RE: CUCRFP07-015 ADDENDUM NO. 2

Charlene,

How is CUC going to address the Telesource protest to this RFP?

What effect will this have on the current schedule?

Regards,

Phillip Mendiola-Long, AIF

President - Asia Pacific Office

CUC Response:

The CUC will issue a decision on Telesource CNMI, Inc's protest within the time-period required by CUC's Procurement Rules & Regulations.

Note - The decision by CUC was issued on February 8, 2008.

Subject: CUC RFP 07-015

Hafa Adai Mr. Guerrero and Mr. Sablan:

We have only learned of RFP 07-015 through news reports after the closing of the EOI. I understand that there may be future opportunities to present proposals or respond to further RFP. If that is the case, could you please add EnerWaste International, a waste-to-energy company with an innovative Batch Oxidation System (BOS) two-stage thermal gasification technology that converts both biomass and MSW cleanly, to the email contact mailing list? We should appreciate the opportunity to make a proposal. Please use the contact details listed below. Thank you very

much,

Tim O'Meara

CUC Response:

The deadline for "Expression of interest" was extended up to January 25, 2008. We regret that no further extensions can be allowed, at this stage.

Though CUC would endeavor to send all communications to each of the known potential proposers, all interested parties are requested to check the RFP webpage (<http://cuccnmi.com/>) for the most current updates.
